

Versatile Building Materials April 2015

ip Plastic

What makes us better?

ip-Plastic's approach to the plastic market is unique, innovative, and truly serves the customer's needs.

WE WILL GET YOU THE PRODUCT YOU NEED!

- We are not a subsidiary of any single producer; therefore we are free to source the product you need.
- The traditional market approach is to sell the customer "whatever my company has" instead of "what you really need."
- When you ask a producer, manufacturer, or distributor for a particular product, they do whatever it takes to convince you to buy the product they have.
- Utilizing our combined knowledge and experience in the market, ***ip-Plastic*** works to get you what you need.
- We are experienced professionals, who are used to working with a very large group of the best plastic manufacturers.
- If you have a specific product requirement, and you do not know where to source it: or you just want to check out what else is available "behind the current supplier"

ip-Plastic can offer you highly competitive deals, by sourcing the best material from several sources.

- If you require a special product that no one else carries, we can help you design and have it produced for you.
- We can combine supplies from different sources in order to provide you with the best available option for each of your needs.

WHAT CAN *iP-Plastic* OFFER?

- **Best product at the best price**

- Relationship with multiple manufacturers allows for competitive pricing and a wide range of products
- iP-Plastic purchases several other products from manufactures, so lowest prices in market have been locked in
- We guarantee the quality via TQM

- **Best logistics**

- Utilize existing distribution networks – zero logistical ramp up time!
- Warehouses and products are available immediately
- Years of experience distributing to Menards and others
- Ability to sell Menards full containers at a reduced cost
