# WHAT MAKES US BETTER?

- **iP-Plastic**'s approach to the plastic market is unique, innovative, and truly serves the customer's needs.

## **WE WILL GET YOU THE PRODUCT YOU NEED!**

- We are not a subsidiary of any single producer, therefore we are free to source the product you need.
- The traditional market approach is to sell the customer "*whatever my company has*" instead of "*what you really need.*"
- When you ask a producer, manufacturer, or distributor for a particular product, they do whatever it takes to convince you to buy the product they have.
- Utilizing our combined knowledge and experience in the market, **iP-Plastic** works to get you what you need.

# WHAT MAKES US BETTER?

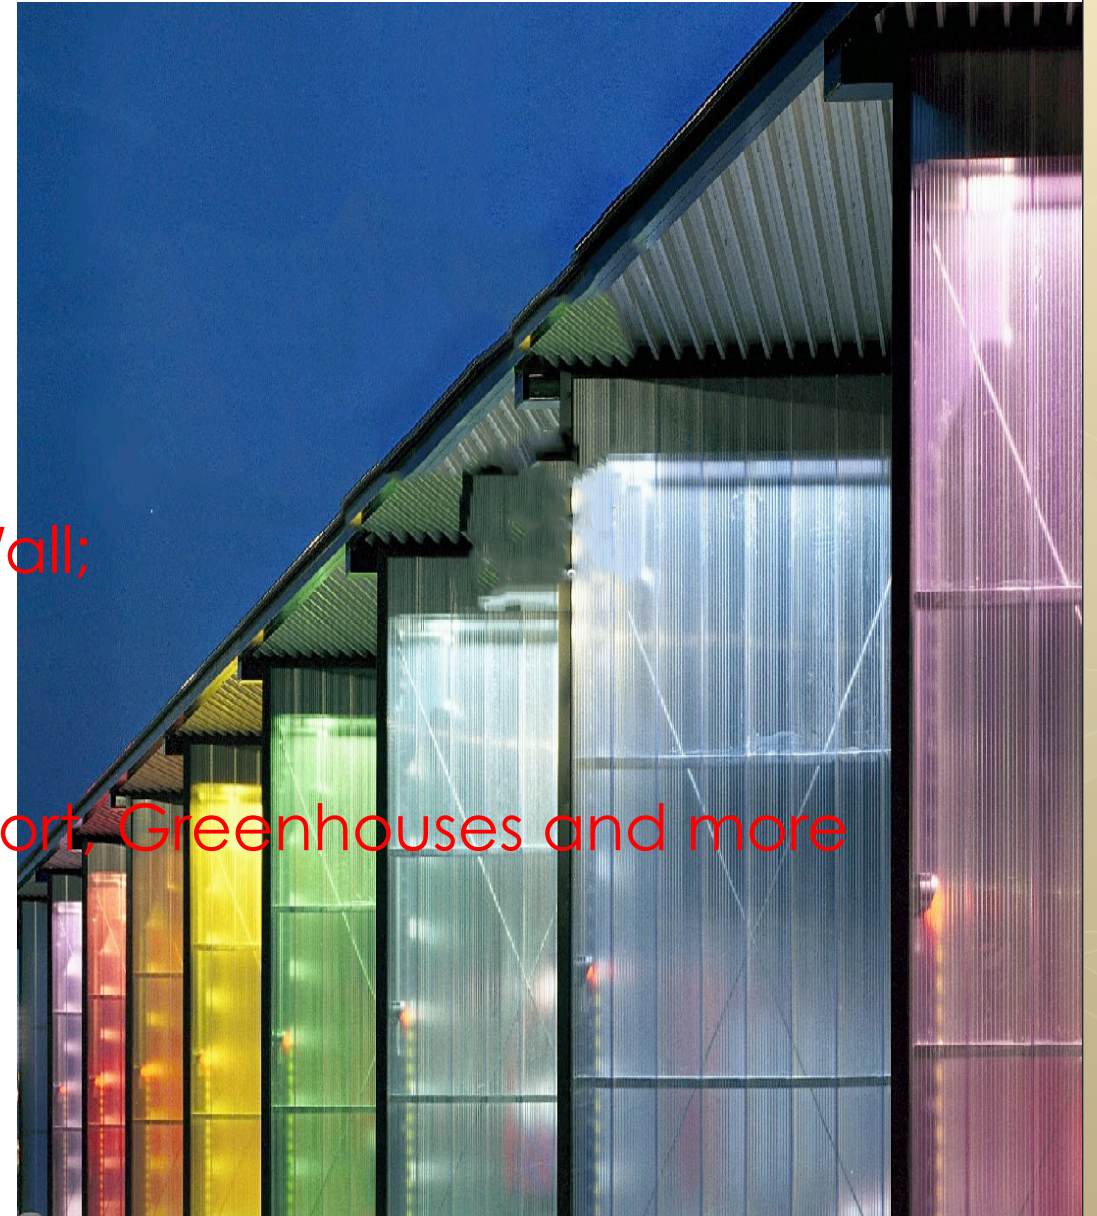

- We are experienced professionals, who are used to working with a very large group of the best plastic manufacturers.
- If you have a specific product requirement, and you do not know where to source it: or you just want to check out what else is available *“behind the current supplier”*:

***IP-Plastic can offer you highly competitive deals, by sourcing the best material from several sources.***

- If you require a special product that no one else carries, we can help you design and have it produced for you.
- We can combine supplies from different sources in order to provide you with the best available option for each of your needs.
- We work with several suppliers which are supervised and verified by us. Manufacturing is made according to our tough / non-compromised QA specifications.
